## 1. General

### 1.1. Version

We're using

**Oracle Database Express Edition 11g Release 2**

from

**4<sup>th</sup> June 2014**

### 1.2. Installation

Find a complete installation tutorial on

[http://docs.oracle.com/cd/E17781\\_01/admin.112/e18585/toc.htm](http://docs.oracle.com/cd/E17781_01/admin.112/e18585/toc.htm)

[https://apex.oracle.com/pls/apex/f?p=44785:24:123063439587718:PRODUCT::P24\\_CONTENT\\_ID,P24\\_PREV\\_PAGE,P24\\_PROD\\_SECTION\\_GRP\\_ID:6281,141,116](https://apex.oracle.com/pls/apex/f?p=44785:24:123063439587718:PRODUCT::P24_CONTENT_ID,P24_PREV_PAGE,P24_PROD_SECTION_GRP_ID:6281,141,116)

The installation is performed via the **Oracle Universal Installer (OUI)**.

We are choosing the

**Advanced Installation**

using the SYS and the SYSTEM database account password

**Chris1**

### 1.3. Oracle Application Express

This tool can be accessed via

**<http://127.0.0.1:8080/apex>**

## 1.4. SQL Developer

This DBMS-tool can be downloaded via

<http://www.oracle.com/technetwork/developer-tools/sql-developer/>

Start the tool and create a new connection.  
Go with these figures:

Datenbankverbindung erstellen/wählen

Verbindungsname | Verbindungsdetails

Verbindungsname: xe\_chris

Benutzername: chris

Kennwort: .....

☒ Kennwort speichern  Verbindungshervorhebung

**Oracle** Access

Verbindungstyp: Einfach Rolle: Standard

Hostname: localhost

Port: 1521

☒ SID: xe

☐ Service-Name

☐ BS-Authentifizierung ☐ Kerberos-Authentifizierung ☐ Proxyverbindung

Status :

Hilfe Speichern Löschen Test Anmelden Abbrechen

## 2. Application Express

You can use Oracle Application Express to create applications with forms linked to tables and data in the database. I don't think that we need this right now.

## 3. JDBC Access

Connecting to the Oracle Database via the JDBC interface succeeded using the Oracle JDBC Library

**ojdbc5.jar**

This library can be found at

<http://www.oracle.com/technetwork/database/enterprise-edition/jdbc-112010-090769.html>

The solution is hosted at

<http://stupid-simple-website.googlecode.com/svn/BAUSTELLE/oracle/j2se-connection/>

## 4. Perl Access

Connecting the Oracle Database via Perl is possible using the built in module

**DBD::Oracle**

The solution is hosted at

<https://stupid-simple-website.googlecode.com/svn/BAUSTELLE/oracle/perl-connection>

## 5. Open Questions

- Why are all preset field and table names in the database in upper case letters?
- Why is the chapter "establish a connection via J2SE" so inflated?

[http://docs.oracle.com/cd/B25329\\_01/doc/appdev.102/b25320/getconn.htm](http://docs.oracle.com/cd/B25329_01/doc/appdev.102/b25320/getconn.htm)

- Is "Application Express" useful in practice?
